

The **Dräger** | saver CF
Now there's an easy escape
route for everyone.

Give yourself breathing space.

Draeger is a world leader in the design and manufacture of breathing apparatus and gas detection systems, an organisation with representation in more than 100 countries. All subsidiaries, agents, production plants and servicing centres are guided by our clear international strategy, “think global, act local”.

The Saver range of Emergency Escape Breathing Apparatus has been designed using the latest technologies available whilst still bearing in mind our three leading principles; reliability, quality and ease of use.

The **saver CF** constant flow emergency escape breathing apparatus allows safe, effective and uncomplicated escape from hazardous environments with the minimum of user training. Extensive customer consultation and testing have been carried out to provide you with the ultimate hooded escape set.

The Dräger | saver CF is designed

The Dräger | saver CF

Automatic activation

The unit is automatically activated on opening the carrying bag and can be simply re-set in the event of false alarm.

Long life neck seal

The air hood neck seal is ozone resistant ensuring high levels of protection, even after storage.

High visibility

The unit is contained in an instantly recognisable orange carrying bag, incorporating photoluminescent panels allowing the unit to be seen at very low ambient light and visibility levels.

Easy inspection

The cylinder contents gauge is clearly visible without any dismantling or adjustments to the unit due to a transparent viewing window located on the side of the bag. This allows for quick and simple cylinder contents inspection.

Made to measure

The **saver CF** has been especially designed to be as easy to don as is possible, regardless of face shape or size and is suitable for users with glasses or facial hair.

ed to be the most easy to use escape set on the m

Pneumatic design

Utilises a simple fail-safe reducer system with excellent flow characteristics giving a consistent air flow rate at all cylinder pressure levels. The combined diffuser and exhalation valve account for excellent air supply combined with a very streamlined hood profile.

Air Hood design

The easy to don flame retardant hood incorporates a wide visor for enhanced peripheral vision and a long life ozone resistant neck seal.

Carrying bag

The high visibility orange carrying bag incorporates photoluminescent panels, is interchangeable for either chestbag or bandolier positions, washable, flame retardant and allows water to self-drain.

Low contents warning

A warning whistle sounds when the unit is nearing the end of its air supply.

Accessories

A full range of accessories are available for use with the **saver CF** including: Storage cabinets for both indoor and outdoor use (with optional wall mounting kit), Safety wash, Waistbelt to prevent excessive movement when set is worn in 'ready' position, Anti-static bag for use in potentially explosive atmospheres, Spare cylinders and Anti-tamper tags.

Fully Approved

The **saver CF** provides breathing air for 10 or 15 minutes, according to cylinder size and is fully approved to EN1146, Lloyds Register Certificate of Fire Approval and Lloyds Register Certificate of Type Approval.

Low cost of ownership

No mandatory routine service is required for a period of 10 years.

Compact design

The **saver CF** is extremely compact in design providing greater freedom of movement.
